***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Banholzer et al US 6506900 and/or Mach et al US 6113877 and King US 4797387.

Banholzer et al, Mach et al and King each teach azabicyclo compounds corresponding to those claimed. See, respectively, column 2 lines 1-70 and column 5 lines 1-70, column 1 lines 35-70 and figures 1-3, and, column 1 line 20 to column 2 line 58. Regarding the varied listing of substituents it is noted that other closely structurally related compounds would have been obvious to one of ordinary skill in the art as the results would not have been unexpected. this is particularly true scope of substituents in the prior art.

No claim is allowed.
